Experience

Webudi — Back-End Developer

📅 Sep 2021 - present

Laravel PHP Javascript Full Stack

- In Webudi, where we develop various projects of different scales, I took on the role of backend developer.
- Alongside developing full-stack applications, I have also thoroughly enjoyed completing numerous projects where I wrote API's.

Sındırgı Belediyesi — Full Stack Developer

📅 Nov 2019 - Aug 2021

Laravel PHP Javascript Full Stack HTML CSS

- I took on the role of IT and press.
- I was responsible for all the processes of the web projects we carried out together with the municipality.

Nano Yazılım — Front-End Developer

📅 Jun 2019 - Nov 2019

HTML CSS Javascript

- It's the first company where I gained experience as a software developer.
- I was converting designs received from Zeplin into UI.

About Me

Hi, I'm Yılmaz, I got passion to write code and develop products, it's a pleasure for me to see that projects, products which I developed are used by clients. Most important things about me, always respected the companies, projects and co-workers which I work for, and then sympathy. I find great excitement in my job, thank you.
